

# Mobile Rail Crane (MRC)

Innovative machine concept for excavators to expand your application range when handling building material, accessing platforms, inspecting bridges, etc.

A productive and profitable accessory to our multipurpose chassis (MPC) and rail trailer chassis (RTC). A strong player in any job environment where time, cost and results matter.

Please contact us to discuss flexible options for your use.

## Main Features

- Maximum working and operational safety
- Built in Height, Slew and Load limitation system (RCI)
- Numerous attachments available
- Folding legs for parking
- Good lifting range\*
