

Grass Mower & Grass Container

Grass Mower and Grass Container help you cut, collect and remove vegetation from road and rail. Eco Rail technology merged with our partner Müller Technologie AG, gives you robust and flexible mowing and suction technology.

Grass Mower is attached to your pulling vehicle. This example shows Müller Unimog U530. Grass Container is mounted on Eco Rail Multi Purpose Chassis (MPC), for flexible use on both road and rail. Invasive vegetation is easily sucked into container during cutting, for convenient disposal.

Please contact us to discuss flexible options for your use.

Main Features

- Mowing head for embankments along road & rail
- Easy remove and transport vegetation
- Hydraulic suction fan
- Container is top accessory to Eco Rail MPC30
- Flexible option: roadregistered MPC30
- Flexible option: multigauge MPC30

Technical Data

Hydraulic Suction Fan for Container

Fan speed:	1500 rpm
Air speed in:	approx. 28 m/s
Air flow volume in:	approx. 3,5 m ³ /s
Air speed out:	approx. 44 m/s
Air flow volume out:	approx. 5 m ³ /s
